

# FUTURE OF FARMING Innovation Tour

**Fieldays<sup>NZ</sup>** 13-16 June 2018

## Fieldays Innovation Tour with Callaghan Innovation

**Wednesday 13 June**  
3:00pm

**Thursday 14 June**  
10:00am and 3:00pm

**Friday 15 June**  
10:00am and 3:00pm

**Location:** Meet inside the International Business Centre (IBC) by reception. The IBC reception team will point you to the tour leader.

Callaghan Innovation has selected a showcase of some of NZ's most innovative and exciting agritech companies for a personal, interactive experience. Join our walking tour at Fieldays to see some leading innovations that are solving problems for farmers globally. You will also hear about future technologies currently in development.

This is an hour-long tour featuring short presentations by agribusiness companies and organisations, with plenty of opportunities to ask questions.

See how New Zealand is helping farmers to work smarter, not harder.

**Register via the link below to secure your spot. You are also welcome to join a group without a reservation.**

**7 Knode**  
D83-85

Knode enables farmers to track and measure the assets that are important to their farm. It simplifies the process to automatically collect, store and display information about assets/resources. Insights driven from this data can help make better decisions, minimise cost, and meet regulatory and compliance requirements.

**8 Halter**  
D83-85

Halter provides dairy farmers with the ability to shift and care for their herd remotely from a smart device. The system uses a solar-powered band that is placed around the neck of each cow and uses sound and vibration to control the movements of each cow.
